

How to register your domain with DomainKing

BY> Edazytech Integrated services ltd

To register your Domain Name with DomainKing.NG you need to follow the following steps:

1. Visit [DomainKing.NG website](https://DomainKing.NG).
2. Search the Domain Name that you want to register:

In the Search Here box enter the Domain Name that you want to register and also select your preferred Domain Extension or tld (like .com, .net, .com.ng etc.) and then click on the “Search” button.

The screenshot shows the DomainKing website interface. At the top, there is a red navigation bar with the DomainKing logo (a crown icon) and the text "DomainKing" and "POWERED BY HOSTAFRICA". To the right of the logo are menu items: "Domains", "Hosting", "Websites", and "Partners". Further right are "Login", "Support", and a "LIVE CHAT" button. Below the navigation bar is a search area with a white input field labeled "Enter Domain Name" and a yellow "SEARCH" button. Below the search field, there are several domain extension options with their respective prices: ".com ₦6300", ".com.ng ₦1500", ".ng ₦10500", "+org ₦7875", and ".kya ₦4650". At the bottom of the search area, there is a yellow banner with the text "#DKHosting Get ₦750/mo Web Hosting with a Free Domain, SSL & Unmetered Bandwidth." and a "Get hosting" button.

3. Check your Domain availability & Select the Validation term

Now you will be redirected to the Register Domain page. Please check the checkbox “I’m not a robot” and click on the search button.

4. If your Domain Name is available, then you will see a message like Congratulations, yourdomain.com is available!. Click on Add to Cart and then click on the Checkout button.

5. Select our free addon Services

Select the free Addon Services that you want to use with your Domain. We offer the following free add-on services:

DNS Management to setup A, CNAME, MX, TXT Records (FREE!): We offer free DNS services for every domain for setting up A records, CNAME, etc. This service is useful

for blogger integration that is if you want to set your custom domain in your Blogspot blog.

ID Protection/Whois Privacy Protection (FREE!): We offer a free ID Protection service for hiding the whois details of your domain for protection against spammers & your privacy.

Enter your nameservers: After selecting the free Add-on services you need to enter the Nameservers of your hosting provider to which you want to point your domain. You can also change the nameservers after your domain is registered. After that click on "Continue to Final Checkout Page".

Note: By default, we have entered the Nameservers of our free DNS service. If you are using hosting service of any other provider then you can change the Nameservers to point to their hosting.

Domains Configuration

Please review your domain name selections and any addons that are available for them.
